

# IONPURE® MX LOW FLOW CONTINUOUS ELECTRODEIONIZATION (CEDI) MODULES

#### **IONPURE MX MODULES**

The lonpure<sup>®</sup> MX Series modules are designed with proven continuous electrodeionization (CEDI) technology. Performance on these modules has been optimized to produce high purity water for laboratory and smaller scale applications. A wide nominal flow range from 30 – 500 liters per hour increases the applicability for single module installations.

# **MX Series Features**

- Double O-ring seal & housing guarantees leak-free operation
- Superior electrical isolation
- 75 psi (5 bar), 113°F (45°C) continuous operation
- Proprietary "all-filled" concentrating compartments eliminate recirculation pump and brine injection
- Significantly lower operating costs
- Generate mixed-bed quality deionized water without the use of chemicals
- No need for acid/caustic, neutralization system or exchangable DI tanks
- Continuous production instead of batch, with consistent quality

Ionpure modules consistently deliver maximum reliability and superior performance for power, HPI/CPI, microelectronics, food and beverage and laboratory applications without regeneration downtime.

## **ELECTRICAL REQUIREMENTS**

Maximum module requirements are 200, 400, 600 VDC, 2.5 Amps.

# **OPERATING ENVIRONMENT**

Installation should be indoors with no direct sunlight and should have a maximum ambient room temperature of 113°F (45°C).

#### **QUALITY ASSURANCE STANDARDS**

CE marked. Each module is factory tested to meet strict industry standards and is manufactured in an ISO 9001 and ISO 14000 quality and environmental management system.

Halal Certification. All lonpure modules are manufactured in accordance with the Islamic Food and Nutrition Council of America standards (IFANCA), and will carry the Crescent M Halal logo.
